

Invigilator Attendance Scanner Guide

Instructions for marking exam attendance using the ExamPulse web app

Important: Please open the scanner link before the exam starts. The OCR scanner may take **20–40 seconds** to load the first time on a phone.

1. What You Need

Scanner link	https://exampulse.xyz/scan
Access code	Your personal invigilator code, sent by email
Device	Any phone with a camera and internet access
Browser	Safari on iPhone, Chrome/Samsung Internet on Android

2. Sign In and Select Your Room

1. Open the scanner link on your phone: <https://exampulse.xyz/scan>
2. Enter your invigilator access code.
3. Select the room where you are invigilating.
4. Allow camera access when prompted.
5. Wait for the OCR scanner to finish loading.
 - After signing in, you will only see the room(s) assigned to you for the active exam.
 - Make sure the room name matches your physical exam room.

Sign in with access
code

Select assigned room

OCR loading message

3. Scan a Student ID

1. Hold the student ID card under the camera.
2. Place only the **student number** inside the red scan box.
3. Keep the card steady for a moment.
4. When the correct student number is detected, review the student details and tap **Mark Present**.
5. If OCR detects the wrong number, edit the number manually and tap **Lookup** again before marking attendance.

Important: The scanner reads the printed student number, not the barcode. It is optimized for low-light exam rooms, but if scanning is difficult, use the torch button or manual entry.

Live scanner with red scan box

Correct ID detected

Edit misread ID and look up again

4. Understand the Scan Results

Present

Student is in the correct room. Mark attendance.

Wrong room

Student belongs to another room. The system will show the correct room/zone.

Already marked

Student has already been marked present for this exam. Do not mark again.

Student not found

Student number is not in the published exam roster. Check the number, edit it if OCR misread it, and tap **Lookup** again. If still not found, contact the Team leader in the room.

5. Wrong-Room Students

If a student is in the wrong room, the app will show the expected room and zone. Inform the room Team Leader and follow their instructions.

- Use **Send to correct room** if the student should move to their assigned room.
- Use **Mark present in this room** only if the Team Leader asks you to record attendance.
- Wrong-room attendance is flagged automatically.

Important: Wrong-room override does not change the student's official room allocation. It only records that the student was marked present in a different room.

6. Manual Entry

Use manual entry if:

- the student forgot their ID card,
- the card is damaged,
- lighting is poor,
- OCR reads the number incorrectly.

Type the student number carefully and tap **Lookup**. The system will perform the same attendance checks as a camera scan.

If the student does not have their physical student ID card, use the **Comments** field to briefly record how their identity was checked. For example: "checked photo of student ID", "checked another photo ID", or "verified by authorised staff".

Wrong-room actions

Manual entry with comments

7. Quick Troubleshooting

Scanner is still loading	Wait 20–40 seconds on first use. Keep the browser tab open.
Camera does not open	Check browser camera permission and refresh the page.
OCR is not detecting	Use torch, keep only the student number inside the red box, or use Manual Mode.
Student not found	Recheck the digits. If still not found, the student may not be in the exam roster.
Network issue	Refresh the page or switch between Wi-Fi and mobile data.
